PLUMBING DIAGRAM OF MILES VAN CAMPER

1/2" Pex (cold water)
1/2" Pex (hot water)
3/4" flexible drain hose
1-1/2' Flexible PVC
1-1/2" PVC
3" PVC

Fresh water + city water connections on exterior driver's side

30 gallon fresh water tank (under bed, below storage bin)
30 gallon grey water tank (underneath van)

Overview

Van floor
Shower pan
3" grey tank drain (Valterra T50 valve)

Sectional View

30 gallon grey water tank (underneath van)

Note: this space between the grey tank and van body is actually only a few inches "tall" I have expanded the cavity shown in this illustration to make space for the two plumbing lines that connect to the top of the grey tank. In reality they are adjacent to each other at the same "height."

NOTE: I AM NOT A PLUMBER. This is only an illustration of what I did with my van. Use at your own risk!

NOTE: I AM NOT AN ELECTRICIAN. THIS IS ONLY AN ILLUSTRATION OF WHAT I DID WITH MY VAN. USE AT YOUR OWN RISK!
